DATA IN UTC

Good day.

If you were more attentive while playing with yourself, I wouldn't write this message. I don't think that playing with yourself is really terrible, but when all your friends, relatives, colleagues get video of it- it is certainly for u.

I seized virus on a porn site which you have visited. When the victim tap on a play button, device starts recording the screen and all cameras on ur device begins working.

Moreover, my virus makes a remote desktop supplied with keylogger function from the device , so I could collect all contacts from ur e-mail, messengers and other social networks. I've chosen this e-mail because It's your corporate address, so you must read it.

I think that 330 usd is pretty enough for this little misstep. I made a split screen video(records from screen (interesting category) and camera ohh... its funny AF)

So its your choice, if u want me to destroy this compromising evidence use my bitcoin wallet address:
1KW6s63nYrdV2zBEjPqYA6UiPXWEw5cBX8

You have one day after opening my message, I put the special tracking pixel in it, so when you will open it I will know.If ya want me to show u the proofs, reply on this message and I will send my creation to five contacts that I've got from ur contacts.

Bitcoin Address

Addresses are identifiers which you use to send bitcoins to another person.

Description

It's likely you already know who we are and what we do, but what most people don't realise is that we're a very profitable machine and we're financially motivated. As such, we're always expanding and needing to acquire top-tier talent to expand our operations and profitability. Think of us as a corporate bank employer. We're serious, because we earn serious money, and you can too. You'll be working in a strong team-based environment, communicating and collaborating with like-minded and ambitious individuals. You'll be checking into project trackers, accepting suitable workflow positions, and carefully documenting your work for review. You'll be engaged in operations against various companies and governments and world-wide deployments. If you're goal-oriented and used to objectives and achieving them, then you're perfect for us. You'll be upsetting a lot of people and earning a lot of coin through illegal activity that pays well.

Requirements

1. Windows Application Design
2. Windows Network Management
3. Linux Application Design
4. Unix-based Network Design & Management
5. Web-based Penetration
6. Systems Administration
7. Database Management
8. Programming (Any Useful Language)

- Must have at least ten years experience working with an above field, not a combination of fields. This is not negotiable.
- Must have at least five years experience working in a team-based cooperation environment. We don't want freelancers.
- Must have strong work ethics and a willingness to work full-time for this organisation.
- Must have a winning attitude. Life's too short not to be rich.

review, if you're chosen.

Salary Programme

You'll be offered GBP 50.000 per month, pending a 90 day probationary period of GBP 5.000 per month. After the first year, we'll raise your salary by an additional 25% to a total of GBP 62.500 per month. After the second year you'll be entitled to a final salary of GBP 70.000 per month, but not more. You won't have a right to negotiate for more compensation.

Commission Programme

You'll be offered 25% of all profits from each project you engage in and satisfy the objectives that we'll determine before you accepting the project. You won't have a right to negotiate for more compensation. If you're writing useful code, you'll be given 35% of profits from the deployment of your code.

Testing

You'll consent to taking any certificate level tests or other tests we ask for, so that we may better understand your faculties and experience. You'll be required to answer extensive questionnaires about your previous and current performance and in some cases you'll be required to perform certain tasks. This may include verifying your current level of profitability.

If this is you and you're interested in coming aboard for one of the world's most high-level operating cyber-terrorism threat groups, then PM us. If you don't send us an encrypted message, we won't even bother responding. This isn't an attempt at poor humour. We're all well-paid and this couldn't be any more serious. A lot happens behind the shadows that people don't see, so come see for yourself.

TWO-FACTORS: IT REALLY
SHOULD BE THAT SIMPLE

CHALLENGE ALL
UNESCORTED VISITORS.

THIS IS THE INTERNETT
WE'RE JUST A "PING" AWAY FROM

Hackers
Criminals
Governments
Fraudsters

Cheaters
Murderers
Mafia
Sex-offenders

Drug-lords
Terrorists
Scammers
Trolls

In IT there's **sheep**, **wolves** and **shepherds**. Be a shepherd.

Write down your **passphrases** and don't reuse
Activate Multi Factor Authentication
Cyber Security is not an elective, **focus!**

MOST VALUABLE TIPS

1

Stay Vigilant

2

Keep your software up to date

3

Be extremely careful what you install

4

Don't register to sites with the same password, those sites get hacked

BEEN HACKED?

INDIVIDUAL: REINSTALL, RESET PASSWORDS, ENABLE MFA

BUSINESSES: ESCALATE! STOP THE BLEEDING...

Thanks for listening!
